

SEE – Clean Cooking Gender Mainstreaming WEBINAR

Photo credit: RVO

Gender responsive electric cooking

Webinar | Tuesday, November 25, 2025 | 10:00–11:30 CEST

Join us for our participatory conversation and learning session on **gender responsive strategies in electric cooking programmes**. Hear directly from implementers of e-cooking programmes and learn from their experiences.

Background

E-cooking is safer, healthier, and cost-effective, while reducing reliance on biomass and LPG. It eases women's workload, improves health, and can empower them as key drivers of clean cooking adoption.

As part of the SEE-Clean Cooking programme, ENERGIA explored how gender and social inclusion have been integrated in e-cooking programmes in Nepal and Cambodia. The findings are presented in this interactive online session, co-hosted by ENERGIA and RVO, where we will discuss challenges, solutions and impacts.

Agenda

Welcome and introduction

Setting the scene: Gender responsive electric cooking

Expert conversation: Insights from e-cooking programs in Cambodia and Nepal

Expert conversation: The business perspective

Q&A

Reflection and closing remarks

**Register and meet us virtually on
November 25, 2025
